**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of Species I in Paper No. 5 is acknowledged.

***Specification***

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
3. The disclosure is objected to because of the following informalities: Page 18, line 19 ".n<sup>2</sup>" should be deleted.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claim 41 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The last paragraph of the claim is not clear. What operational conditions are being referred to?

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2839

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1, 34-39 and 41 are rejected under 35 U.S.C. 102(e) as being anticipated by Laor et al.

Laor (Figure 4) shows an optical switch 10 having a plurality of switch cells with n (4) inputs and m (4) outputs, a substrate 16 of size larger than the total switch size, first & second mirrors 22, 32 parallel to each other and perpendicular to the substrate, an optical unit providing a plurality of paths inclined to the mirrors for n inputs and m outputs and each cell having a movable mirror 74. The paths guide lights from a plurality of input ports to a plurality of output ports. All optical paths from input port to output ports are equal thus providing optical losses to be equal. The reflecting mirrors 22, 32 are outside the optical paths.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okayama et al., Daneman et al., and Zang et al. are also of interest.
